- 1 In the STEINEL Connect app, navigate to the "More" tab.
- And open "Update firmware".
- Tap "Select products".

#### 1. Get ready to start Mesh-Update

- Download the STEINEL Connect app. You will need this to complete the process.
- Start the STEINEL Smart Remote app and tap • "Connect via Bluetooth".
- Via Bluetooth, now search for the product you want to update and connect to it.
- Scroll to the network, update and password settings.
- Select the new "Mesh-Update" button.
- (If this button is not displayed, go one step back.)

#### 2. Carry out Mesh-Update

- Note: You cannot undo the Mesh-Update! •
- Tap "Update" to start updating.
- Opdate 1/2 now begins. •
- Once update 1/2 has been completed, the product will re-start. The connection is restored automatically.
- <sup>3</sup> As soon as the connection is restored, update 2/2 will start • automatically.
- Having successfully completed both updates, you must now continue in the STEINEL Connect app. Tapping the orange link automatically opens the app.

### 4. Carry out firmware update

- • You will now see the product with the completed Mesh-Update as "SfuTg xxxxxx".
- <sup>2</sup> Select the product and start the last update.
- You have now successfully completed the Mesh-Update. You will now find the product with the correct designation in the product search function and can add it to your network.

#### 5. Set up product in the new network

Note: You only need create a new network if a network does not already exist. Otherwise continue at points 6 and 7.

- Create a new network.
- Give the network an appropriate name.
- The newly named network will now come up as one of your own networks.

#### 6. Add product to network

#### 7. Finish configuring product
